APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
10/821,016	04/08/2004	Chiu-Chien Yuan	24061.93 (TSMC2003-0372)	9310
42717 7590 04/15/2009 HAYNES AND BOONE, LLP IP Section 2323 Victory Avenue Suite 700 Dallas, TX 75219			EXAMINER SHAW, PELING ANDY	
			ART UNIT 2444	PAPER NUMBER
			MAIL DATE 04/15/2009	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/821,016	Applicant(s) YUAN ET AL.	
	Examiner PELING A. SHAW	Art Unit 2444	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 January 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Amendment received on 01/12/2009 has been entered into record. Claims 1, 3 10 and 19-26 are amended. Claims 1-26 are currently pending.

Priority

2. This application has no priority claim made. The filing date is 04/08/2004.

Claim Rejections - 35 USC § 112, second paragraph

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph as following:

- a. Independent claims 1, 10 and 19 are amended to include the limitations of “selecting at least one of a plurality of input files”, “selecting an output file format from a plurality of output file formats”, “selecting a mode for circulation from a plurality of modes for circulation”, “extracting file information from the selected at least one input file to the an output file in the selected output file format”, “circulating the output file to at least one recipient entity using the selected mode for circulation”, “circulating the output file to at least one recipient using a selected one of a plurality of circulation modes” and “a communication system connected to the network, and configured to extract data from at least one input file to an output file having a format selected from one of a plurality of file formats and circulate the output file to a plurality of recipients using a selected one of a plurality of modes for circulation”.

Applicant argues the current claimed invention vs. the prior art, i.e. Lu. Examiner has reviewed the amendments vs. applicant’s original specification and claim set. It is not

Art Unit: 2444

clear where are the supports for these amended changes. Claims 1, 10, 19 and dependent claims 2-9, 11-18 and 20-26 are rejected. These changes seem to be minor and do not modify the scope form applicant's previous claimed invention. However, applicant does argue (see 3rd paragraph on page 7 of current amendment) and thus it is more prudent for applicant to clearly identify the support for these changes. For the purpose of applying art, the amended changes as mentioned above would read in light of previous claimed invention and applicant's original specification.

- b. Dependent claim 3 is amended with the limitation of "prior to the extracting" that is not described in applicant's original specification or claim set. Claim 3 is rejected. The amended change seems not to change the scope of claim. However, it is not clear how the change would affect the interpretation of the claim. For the purpose of applying art, the limitation is considered within the original context of claim 3 and currently amended claim 1.

Appropriate clarification and/or correction are required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7, 10-14, 16 and 19-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Lu et al. (B2B in TSMC Turnkey Services), hereinafter referred as Lu.

- a. Regarding claim 1, Lu disclosed in a semiconductor manufacturing environment with a plurality of separate entities (background), a computer-implemented method for circulating a file between the entities (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: send shipping instruction to subcontractor and shipping alert to customers through a XML format and e-mail) comprising: selecting at least one of a plurality of input files (3rd paragraph on left column of page 41 and 5th paragraph on right column of page 41: entering inventory INSLIP data); selecting an output file format from a plurality of output file formats (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: send in XML format); selecting a mode for circulation from a plurality of modes for circulation (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: e-mail); extracting file information from the selected at least one input file to an output file in the selected output file format (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: process INSLIP, send shipping instruction and shipping alert in XML format) ;

Art Unit: 2444

- and circulating the output file to at least one recipient entity using the selected mode for circulation (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: send to subcontractors and/or customers).
- b. Regarding claim 2, Lu disclosed the computer-implemented method of claim 1, wherein the at least one input file comprises a product manufacturing report from a semiconductor foundry (4th paragraph on left column of page 41: cycle time reports and yields reports).
 - c. Regarding claim 3, Lu disclosed the computer-implemented method of claim 1, further comprising converting the at least one input file to a different file format prior to the extracting (2nd paragraph on left column of page 44: aggregate all subcontractor's information in one format).
 - d. Regarding claim 4, Lu disclosed the computer-implemented method of claim 1, wherein the mode for circulation comprises e-mail (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: send through e-mail).
 - e. Regarding claim 5, Lu disclosed the computer-implemented method of claim 1, wherein the mode for circulation comprises facsimile (3rd paragraph on left column of page 44: exchange the hard copy WO and invoice through FAX).
 - f. Regarding claim 7, Lu disclosed the computer-implemented method of claim 1, wherein the at least one input file comprises at least two input files (3rd paragraph on left column of page 41 and 3rd paragraph on left column of page 42: integrate lot status (FAB + Circuit Probing + AS + FT)).

Art Unit: 2444

- g. Regarding claim 10, Lu disclosed a computer-implemented method for circulating a file associated with the manufacture or sale of semiconductor devices, the method comprising: closing an application file responsive to a user request (in light of paragraph 23 on pages 5-6 and paragraph 59 on page 13 of applicant's specification; 4th paragraph on left column of page 43: request for reporting system); querying the user if the application file is to be circulated (3rd paragraph on left column of page 41: report oriented, yield data, ship alarm, produced some kinds of data to ask the subcontractor to provide, electronic purchase order, confirmed shipping dates), wherein the preparing comprises converting the application file to another application file type if necessary (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: process INSLIP, send shipping instruction and shipping alert in XML format); if the application file is to be circulated, checking and determining the application file type (2nd paragraph on left column of page 43: format/data type check, content context check); preparing the application file for circulation (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: process INSLIP, send shipping instruction and shipping alert in XML format); and circulating the output file to at least one recipient (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: send to subcontractors and/or customers) using a selected one of a plurality of circulation modes (last paragraph on right column of page 43 through 1st paragraph on left column on page 44: send to subcontractors and/or customers).

Art Unit: 2444

- h. Claims 11-14 and 16 are of the same scope of claims 2-5, 7 and 10. These are rejected for the same reasons as for claims 2-5, 7 and 10.
- i. Claims 19-23 are of the same scope of claims 1-5. These are rejected for the same reasons as for claims 1-5.

Lu disclosed all limitations of claims 1-5, 7, 10-14, 16 and 19-23. Claims 1-5, 7, 10-14, 16 and 19-23 are rejected under 35 U.S.C. 102(b).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 8-9, 15, 17-18 and 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lu and further in view of Nicholls et al. (US 6363414 B1), hereinafter referred as Nicholls.

- a. Lu has shown claims 1, 10 and 19 substantially as claimed. Lu does not explicitly show wherein the mode for circulation comprises a wireless device. However Lu does show circulating files in FAX or e-mail (see claim 13-14 rejections above).
- b. Nicholls shows (column 1, lines 16-42) that any device capable transmitting electronic data can now send and receive e-mail message (e.g. cellular phone and hand-held computer devices having wireless communication capabilities) in an analogous art for the purpose of converting an email message to a different format

Art Unit: 2444

- and retransmitting to a location other than recipient address information in the email message.
- c. It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to modify Lu's functions of B2B in turnkey services with Nicholls' functions of transmitting e-mail in wireless communication.
 - d. The modification would have been obvious because one of ordinary skill in the art would have been motivated to apply e-mail over wireless electronic data transporting capability per Nicholls as applied to the general art of e-mail communication as per Lu's (last paragraph on right column of page 43 through 1st paragraph on left column on page 44) and Nicholls (3rd paragraph in column 1)'s teaching.
 - e. Regarding claim 8, Nicholls shows wherein the mode for circulation comprises sending an e-mail to at least two different entities, the at least two different entities having different e-mail systems (Fig. 2a and column 2, line 49 through column 3, line 321: internet based e-mail, delivery e-mail via facsimile, pager or telephony).
 - f. Regarding claim 9, Nicholls shows wherein the mode for circulation comprises sending an e-mail to at least one entity, and sending a facsimile to at least one other entity, the at least one other entity being at a different location than the at least one entity (column 5, line 52 though column 6, line 16: received e-mail may be faxed to subscriber's home facsimile machine).
 - g. Claims 15, 17-18 and 24-26 of the same scope as claims 1, 6 and 8-10. These are rejected for the same reasons as for claims 1, 6 and 8-10.

Art Unit: 2444

Together Lu and Nicholls disclosed all limitations of claims 6, 8-9. 15, 17-18 and 24-26.

Claims 6, 8-9. 15, 17-18 and 24-26are rejected under 35 U.S.C. 103(a).

Response to Arguments

6. Applicant's arguments filed on 01/12/2009 have been fully considered, but they are not persuasive.
- a. Applicant has amended claim language to address claim rejections and claim rejections under 35 U.S.C. 112, second paragraph as per section 3 and item c of section 4 of office action mailed on 11/03/2008. Applicant has further clarified claim rejections under 35 U.S.C. 112, second paragraph as items a and b of section 4 of office action mailed on 11/03/2008. Examiner has reviewed and accepted claim amendments and clarification. The previous claim objections and rejections under 35 U.S.C. 112, second paragraph are withdrawn.
 - b. As states in item a above, applicant has amended claim 1 with the limitations of "selecting ... from a plurality of ..." and examiner does not find the support for these limitations. However, applicant does argue that Lu does not have these limitations as per 3rd paragraph on page 7 of current amendment. As one skill in the art would know that "selecting ... from a plurality of ..." is not different from "choosing at least one" unless it is more specific about what is chosen from, i.e. to narrow the selection. As Lu has shown (3rd paragraph on left column of page 41 and 5th paragraph on right column of page 41) asking some kinds of data to provide, i.e. seems to allow selecting from different inputs; (last paragraph on right column of page 43 through 1st paragraph on left column on page 44) send in XML format, FAX, e-mail and phone, i.e. selecting from different output (file) formats and modes. Thus Lu seems to have the amended and argued limitations.

Art Unit: 2444

- c. Claim rejections are updated to reflect the current amended claim changes as above.

Conclusion

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to the enclosed PTO-892 for details.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peling A. Shaw whose telephone number is (571) 272-7968. The examiner can normally be reached on M-F 8:00 - 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William C. Vaughn can be reached on (571) 272-3922. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished
